

ANALYZER DISCHARGE BAG

This bag is a simple and cost-effective system for collecting measuring gas in case it cannot be returned directly into the circuit breaker. Its handling is very easy: Connect the bag with the hose included in the scope of supply to the measuring device.

The discharge gas collecting bag allows collecting the SF₆ from up to 25 measurements. The gas can be removed from the discharge gas collecting bag with any service cart and by means of the supplied hose and coupling. When using this system no SF₆ is released into the atmosphere. It is light, practical and environmentally friendly.

- 52 l capacity
- Light folding bag for comfortable transportation
- Integrated safety valve (pe = 100 mbar)
- Self-closing miniature couplings
- DILO coupling DN8 with hose connection (to recover the bag)
